

Subject : Request for Consideration of Attendance Shortage Based on Academic and Competitive Achievements

Respected Mam,

My name is Ayush Chavan, a student of Sixth Semester, B.Tech Computer Science and Engineering (Artificial Intelligence) at Vishwakarma Institute of Technology, Pune. I am writing this application with utmost respect to request your kind consideration regarding my attendance status for the current semester.

Due to my involvement in advanced technical preparation and participation in competitive programming activities at national and international levels, I was unable to attend college during the initial month of the semester beginning from 5th January, which has resulted in my attendance being recorded as 26%. I sincerely understand and respect the attendance regulations of the institute.

I would like to humbly explain that my absence was solely due to academic commitments focused on building strong technical skills and preparing for highly competitive off-campus placement opportunities in leading technology companies.

I am actively involved in competitive programming and have represented in the ICPC (International Collegiate Programming Contest) Regionals, where my team secured an All India Rank of 163. Along with this, I consistently participate in reputed coding competitions and maintain strong rankings on recognized competitive programming platforms.

Currently, I hold an Expert rating on Codeforces and am ranked among India's top 1700 coders on the platform. Additionally, I am a Guardian on LeetCode, placing me among World's top 10,000 coders. These achievements reflect my continuous efforts towards technical excellence and industry-level preparedness.

As a result of this consistent preparation and performance, I have also received interview opportunities from reputed technology companies, including an interview opportunity at Google during my second year of engineering. I am attaching the official communication along with other relevant proofs for your kind verification.

My intention behind focusing on these activities is to enhance my academic and professional competence in the field of computer science, which directly aligns with my course of study and long-term career goals.

Thanking you for your time and kind consideration.

Yours sincerely,
Ayush Chavan
